Summary

Full Stack Developer with hands-on experience in the MERN stack, building scalable and production-ready web applications. Strong understanding of system design fundamentals, REST API development, and frontend performance optimization. Proven ability to deliver real-world projects with authentication, state management, and third-party API integrations.

Technical Skills

Languages: Java, JavaScript, HTML, CSS
Frameworks: React, Node.js, Express.js, Tailwind CSS, Bootstrap
Backend: REST APIs, MongoDB, Firebase Authentication
Tools: Git, GitHub, Postman, Linux

Work Experience

Corepjack Technologies

Nov 2025 – Present

Full Stack Developer

Delhi

- Developed and deployed **full-stack web applications** using MERN stack, improving feature delivery speed by **30%**
- Designed and implemented **RESTful APIs** handling user authentication and CRUD operations for production systems
- Improved application performance by optimizing API calls and frontend rendering, reducing load time by **25%**
- Collaborated in an agile team using Git, Postman, and Firebase, ensuring smooth CI/CD workflows

Projects

Learn-Code (EdTech LMS Platform) | Live | GitHub

MERN

- **Full-Stack LMS Platform:** Built a Udemy-style learning platform with **Student, Instructor, and Admin** roles
- **Authentication System:** Implemented secure login/signup, OTP verification, password reset using **JWT + MongoDB**
- **Course Management:** Developed instructor dashboard to create, edit, and manage courses, sections, and video lessons
- **Payments Integration:** Integrated **Razorpay** for course purchase and enrollment workflow
- **Media Handling:** Used **Cloudinary** for video and thumbnail uploads with optimized delivery
- **State Management:** Implemented global state using **Redux Toolkit** for cart, authentication, and progress tracking

ImageKit Short Video Platform | GitHub

Next.js

- **Reels-Style Video App:** Developed a short-video platform with upload, feed browsing, and video playback
- **Authentication:** Implemented credential-based authentication using **NextAuth** with protected routes
- **Media Upload Pipeline:** Integrated **ImageKit** for direct client uploads with signed authentication
- **Database Design:** Used **MongoDB + Mongoose** for storing users and video metadata
- **Modern UI:** Built responsive UI using **Next.js App Router + Tailwind CSS + DaisyUI**

CRUD Application | Live

MERN

- **Scalable CRUD System:** Engineered a full-stack application supporting real-time data operations
- **REST API Architecture:** Designed modular backend using **Node.js + Express**
- **Database Optimization:** Utilized **MongoDB** for efficient data storage and retrieval

Education

Galgotias University

2021 – 2025

B.Tech in Computer Science and Engineering

India

- CGPA: **7.2**
- Relevant Coursework: Data Structures and Algorithms, DBMS, OS, OOP, Web Development, Artificial Intelligence
